TABLE DES MATIÈRES DU VOLUME XXVIII

C O M M U N I C A T I O N S

	Pages
H. S. Al-Amiri, *On the radius of univalence of certain analytic functions*	133-139
J. T. Baldwin, *A sufficient condition for a variety to have the amalgamation property*	181-183
J. Barańska, *Domain of partial attraction for infinitely divisible distributions in a Hilbert space*	317-322
K. Baron and R. Ger, *On Mikusiński-Pexider functional equation*	307-312
A. Błaszczyk, *A factorization theorem and its application to extremally disconnected resolutions*	33-40
H. Daboussi et J. Peyrière, *Fonctions arithmétiques multiplicatives et multiplicateurs des coefficients de Fourier des fonctions de puissance p-ième sommable*	261-266
M. Déchamps-Gondim, *Interpolation linéaire approchée des fonctions bornées définies sur un ensemble de Sidon*	255-259
J. B. Fugate and L. Mohler, *Quasi-monotone and confluent images of irreducible continua*	221-224
— *A note on open mappings of irreducible continua*	225-226
K. M. Garg, *Monotonicity, continuity and levels of Darboux functions*	91-103
R. Ger *voir* K. Baron and R. Ger	
M. Guerquin, *Non-hilbertian structure of the Wiener measure*	145-146
J. W. Hinrichsen, *Concerning irreducible continua of higher dimension*	227-230
H. Höft, *A characterization of strong homomorphisms*	189-193
S. A. Huq, *The semiring of quotients of commutative semirings*	185-188
K. D. Joshi, *Characterizing plane ANR's by existence of local means*	41-46
C. F. K. Jung, *Mappings and inductive invariants*	29-31
K. Kaiser, *On generalized projective classes*	1-5
— *On reductive and projective classes*	7-9
R. Kaufman, *A Kronecker theorem in functional analysis*	247-250

A. F. Kleiner, *Unbounded multipliers and summation of series* 287-289

M. Kłosowska, *A characterization of the domain of attraction of a normal distribution in a Hilbert space* 323-327

V. Komkov, *A note on the semi-inverse approach to oscillation theory for ordinary second-order linear differential equations* 141-144

M. Kuczma, *Cauchy's functional equation on a restricted domain* 313-315

N. K. Kundu, *On approximate symmetric derivative* 275-285

A. Macintyre and H. Simmons, *Gödel's diagonalization technique and related properties of theories* 165-180

R. McLaughlin, *A variational method for a class of odd functions in an annulus* 299-305

A. Mitschke, *On a representation of groupoids as sums of directed systems* 11-18

R. N. Mohapatra, *Note on summability (L) of Fourier integrals* 291-297

L. Mohler, *A characterization of hereditarily decomposable snake-like continua* 51-56

— and J. B. Fugate *voir* J. B. Fugate and L. Mohler

S. A. Morris, *Varieties of topological groups generated by maximally almost periodic groups* 47-50

Z. Ogrodzka, *Every paracompact C^m-manifold modelled on the infinite countable product of lines is C^m-stable* 57-67

J. Peyrière *voir* H. Daboussi et J. Peyrière

T. Przymusiński, *Inverse invariance of metrizability for ordered spaces* 211-220

H. W. Pu, *On the derivative of indefinite RC-integral* 105-110

M. Rochowski, *Length-preserving deformations of closed plane curves* 231-246

Z. Rychlik and D. Szynal, *On the limit behaviour of sums of a random number of independent random variables* 147-159

D. N. Sarkhel, *On ω-approximately continuous Denjoy-Stieltjes integral* 111-131

B. M. Schein, *Compatible function semigroups* 19-26

W. Schwarz, *Eine weitere Bemerkung über multiplikative Funktionen* 81-89

N. Shilkret, *Dimension of non-Archimedean Banach spaces* 77-79

H. Simmons *voir* A. Macintyre and H. Simmons

C. Swartz, *Weakly compact operators from a B-space into the space of Bochner integrable functions* 69-76

F. A. Szász, *On some weakly supernilpotent radicals of rings* 195-201
D. Szynal *voir* Z. Rychlik and D. Szynal
R. Valent, *Every lattice is embeddable in the lattice of T_1-topologies* 27-28
E. J. Vought, *A countable connected Urysohn space with a dispersion point that is regular almost everywhere* 205-209
W. Więsław, *Extensions of topological fields* 203-204
W. Wojtyński, *Banach spaces admitting essentially infinite-dimensional representation of a compact group* 267-273
W. Żelazko, *On multiplicative linear functionals* 251-253

P R O B L È M E S

P 1, P 2, ... désignent les problèmes posés; **R1, R2,** ... désignent les réponses et remarques concernant le problème en tête de ligne. Les autres numéros indiquent les pages. Celles des communications déjà citées dans les remarques sont omises.

P 200, R 2 329.
P 416, R 1 161.
P 644, R 1 329.
P 744, R 1 161.
P 749, R 1 161.
P 850 - P 854 162.
P 855 163.
P 856 - P 869 329.
