Table des matières du tome XLVI

	Pages
W. Kleiner, Franciszek Leja	1–11
E. Bedford, Envelope of Dirichlet problems on a domain in C^n	13–18
P. Besala, Finite difference approximation to the Cauchy problem for non-linear parabolic differential equations	19–26
J. Bochenek, Existence of a minimal solution and a maximal solution of a nonlinear elliptic boundary value problem of the fourth order	27–34
P. Caraman, Boundary behaviour of quasiconformal mappings in normed spaces	35–54
U. Cegrell, Small sets in C^n	55–60
K. Ciesielski, Continuity in semidynamical systems	61–70
Z. Ciesielski and J. Domsta, The degenerate B-splines as a basis in the space of algebraic polynomials	71–79
M. Downarowicz and A. Janik, On the growth of entire functions of n complex variables	81–84
L. M. Drużkowski and K. Rusek, The formal inverse and the Jacobian Conjecture	85–90
J. Fuka, On the continuity of the Faber mapping	91–103
B. Gaveau, J. Kalina, J. Ławrynowicz and L. Wojtczak, The global Yang–Mills equations depending on an arbitrary metric	105–114
Z. J. Jakubowski, H. Siejka and O. Tammi, On the maximum of $a_4 - 3a_2a_3 + \mu a_2$ and some related functionals for bounded real univalent functions	115–128
M. Jarnicki and P. Pflug, Non-extendable holomorphic functions of bounded growth in Reinhardt domains	129–140
Y. Komatu, On the range of analytic functions related to Carathéodory class	141–145
I. Kra, On algebraic curves (of low genus) defined by Kleinian groups	147–156
J. G. Krzyż, Generalized Fredholm eigenvalues of a Jordan curve	157–163
R. Kühnau, Zur quasikonformen Spanne	165–170
J. Leiterer, An implicit function theorem in Banach spaces	171–175
Z. Lewandowski, Some remarks on univalence criteria for functions meromorphic in the exterior of the unit disc	177–181
K. Menke, Tsuji points and conformal mapping	183–187
Z. Mikołajska, Une remarque sur les solutions bornées d'une équation différentielle avec pilotage	189–192
J. Mikusiński, On some classes of infinitely decomposable Sobolev–Schwartz test functions	193–195
W. Mlak, Operators induced by transformations of Gaussian variables	197–212
M. Nacinovich, On boundary Hilbert differential complexes	213–235
Nguyen Thanh Van, Condition polynomiale de Leja et L-régularité dans C^n	237–241
A. Pelczar and A. Trzepizur, Stability in generalized processes	243–263

W. Pleśniak, Leja's type polynomial condition and polynomial approximation in Orlicz spaces 265–275
A. Rost et J. Śladkowska, Sur une inégalité de Garabedian–Shiffer–Nehari pour les fonctions univalentes bornées 277–290
W. Rudin, The Ryll–Wojtaszczyk polynomials 291–294
P. Rusev, Laguerre series and the Cauchy integral representation 295–297
J. Siciak, Approximation by transcendental polynomials 299–309
M. Skwarczyński, A general description of the Bergman projection 311–315
J. Stankiewicz, Neighbourhoods of meromorphic functions and Hadamard products 317–331
Z. Szmydt and B. Ziemian, An invariance method for constructing fundamental solutions for $P(\Box_m)$ 333–360
W. Tutschke, On the approximation of continuous functions by solutions to partial complex differential equations 361–364
J. Wermer, On the Theorems of Hartogs and Bishop 365–369
R. Wolak, On G-foliations 371–377
Z. Wronicz, On some properties of LB-splines 379–388
W. Żelazko, A non-m-convex algebra on which operate all entire functions . . . 389–394
Л. А. Айзенберг, Применение многомерного логарифмического вычета к теории чисел. Интегральная формула для разности между числом целых точек в области и её объёмом 395–401
Л. И. Ронкин, А. М. Руссаковский, О продолжении с оценками функции, голоморфной на алгебраическом множестве 403–431
А. Садуллаев, Экстремальная плюрисубгармоническая функция единичного шара $\bar{B} \subset R^n$ 433–437
В. С. Владимиров, А. Г. Сергеев, О компактификации пространства Минковского и комплексном анализе в трубе будущего . . . 439–454
