Program 11–14

I. PAPERS SUBMITTED TO THE CONFERENCE

R. M. Aron, The range of vector valued holomorphic functions 17–20
P. Caraman, About a conjecture of F. W. Gehring on the boundary correspondence by quasi-conformal mappings 21–33
J. Chmielowski, Théorèmes d'identité en dimension infinie 35–37
C. O. Kiselman, On the radius of convergence of an entire function in a normed space 39–55
O. Lehto, Analytic families of quasi-conformal mappings 57–62
E. Ligocka, Levi forms, differential forms of type (0, 1) and pseudoconvexity in Banach spaces 63–69
Nguyen Thanh Van, Fonctions séparément analytiques et prolongement analytique faible en dimension infinie 71–83
Ph. Noverraz, Sur la topologie tonnelée associée a la topologie de Nachbin 85–89
H.-J. Roßberg, New viewpoints, results and problems in the theory of Phragmén–Lindelöf 91–100
M. Skwarczyński, Some applications of the theorem on rational approximation in the mean 101–106
K. Stein, Dependence of meromorphic mappings 107–115
O. Tammi, Use of the Power inequality in connection of coefficient regions for bounded univalent functions 117–123
L. Waelbroeck, Vector-valued analytic functions 125–129
J. Waniurski, Some relations between starlike and convex functions . . 131–135
В. П. Захарюта, Экстремальные плюрисубгармонические функции, ортогональные многочлены и теорема Бернштейна–Уолша для аналитических функций многих комплексных переменных (V. P. Zaharjuta, Extremal plurisubharmonic functions, orthogonal polynomials and the Bernstein–Walsh theorem for analytic functions of several complex variables) 137–148

II. SHORT SUMMARIES

Л. А. Айзенберг, Дифференциальные формы, ортогональные голоморфным формам и их свойства (L. A. Aĭsenberg, Differential forms that are orthogonal to holomorphic forms, and their properties) . . 151–152

R. M. Aron and M. Schottenloher, Compact holomorphic mappings on Banach spaces 152
Г. П. Бахтина, Метод граничных вариаций в задачах о неналегающих областях (G. P. Bahtina, Method of extremal variations in problems on non-overlapping domains) 152–153
I. Bârzâ, Non-orientable partial regular Riemannian coverings 153
O. Bereśniewicz-Rajca, Sur les coefficients de fonctions étoilées symétriques 153–154
F. Bierski, Über ein Problem von F. Leja 154–155
J. Bochnak, Sur la factorialité des anneaux de fonctions analytiques . . . 155–156
J. Bochnak, Sur les ensembles analytiques à singularités données à priori . 156–157
F. Bogowski, On modular and domain majorizations in the classes of bounded functions 157
E. Bombieri, Analytic functions and transcendental numbers 158
M. L. Cartwright and N. G. Lloyd, Periodic solutions of holomorphic differential equations 158
G. Coeuré, Propriété de Runge et enveloppe d'holomorphie de certaines variétés analytiques de dimension infinie 158
I. Dolgačev, Isolated crtitical points of analytic functions of three variables 159
O. Forster, Moduli problems in several complex variables 159
M. B. Freeman, Exceptional points on real submanifolds 159–160
D. Gaier, Determination of the conformal module of a quadrilateral . . . 160–161
J. Globevnik, On analytic functions with values in l^p-spaces 161–163
B. Goldschmidt, The additive Cousin-problem for partial differential equations 164–165
J. Górski, Holomorphic continuation of separately analytic functions on a 3-dimensional set in C^2 166
D. Ivaşcu, Direct decomposition of the space $L^\infty(\Omega(\Gamma))$ 166–167
M. Jarnicki, Prolongement analytique des fonctions harmoniques 168
J. Kalina, A variational characterization of the capacity of a condenser in R^n and C^n 168–169
Ф. Кравченко, K_{ml_i}-Функции многих параметров и некоторые вопросы оценок коэффициентов однолистных полиномов (F. Kravčenko, K_{ml_i}-functions in several parameters and some questions relating to estimation of univalent polynomials) 169
С. Л. Крушкаль, Некоторые свойства клейновых групп и их деформации (S. L. Kruškal, Some properties of Klein groups and their deformations) 169–170
J. Krzyż, Symmetrization and harmonic measure 170–172
R. Kühnau, Über Identitäten und eine Kernfunktion in der Theorie der quasikonformen Abbildungen mit ortsabhängiger Dilatationsbeschränkung 172
O. Lehto, Conformal mappings with quasi-conformal extensions 173
F. Leja, On some extremal functions 173–174
P. Lelong, Un théorème de fonctions implicites pour les fonctions plurisousharmoniques et ses application à l'étude des fonctions analytiques 174
Z. Lewandowski and J. Stankiewicz, Modular majorization and inclusion of domains 174–178
J. Ławrynowicz, On a class of capacities on complex manifolds endowed with an hermitian structure and their relation to elliptic and hyperbolic quasi-conformal mappings 178
Cz. Matyszczyk, Approximation of analytic operators by polynomials in Fréchet spaces with bounded approximation property 178–179

C. Michel and U. Pirl, Eine Normalform für dreifach-zusammenhängende in einem Kreisring eingebettete Gebiete 179–180
L. Mikołajczyk, On some method of conditional extremum determination 180–181
K. Miśta, Evaluations de la seconde et troisième dérivée dans la famille des fonctions en moyenne p-multivalentes 181–182
И. П. Митюк, Некоторые применения симметризационных методов в теории функций (I. P. Mitjuk, Some applications of symmetrizing methods in function theory) 182–183
K. Pethe, Estimation of coefficient a_{3k+1} of univalent and k-symmetric functions in the unit circle 183–184
A. M. Pierzchalski, Algebraic criterion of quasi-conformality for Riemannian differential spaces 184
M. O. Reade, Generalizations of Bazilevič functions 184–185
E. Reich, A class of extremum problems for analytic functions 185
H. Renelt, Über eine Variants des Modulpotenzprodukts 185–186
P. Russev, Some boundary properties of series in Laguerre polynomials . . 186
M. Schottenloher, The Levi problem for domains spread over spaces with a basis 186
M. L. Skwarczyński, Analytic continuation of positive definite functions 187
J. Śladkowska-Zahorska, Faber polynomials in the theory of univalent bounded functions 187
S. Takeuchi, On completeness of holomorphic principal bundles 188
P. M. Tamrazov, Resolution of Warschawski–Walsh–Sewell's problem and applications to various questions of analysis 188–190
W. Tutschke, Qualitative properties of generalized analytic functions of several complex variables 190–191
Л. И. Волковыский, Квазиконформные отображения с якобианом переменного знака (L. I. Volkovyskiĭ, Quasi-conformal mappings with jacobian of variating sign) 191–192
P. Walczak, Polynomial structure on principal fibre bundles 192–193
S. Walczak, Application of Pontrjagin's maximum principle to examining some extremal problems 193–194
M. Z. Wojciechowska, Capacity and quasi-conformal mappings on Riemannian manifolds 194
В. П. Захарюта, Некоторые вопросы комплексной „Теории потенциала" (V. P. Zaharjuta, Some aspects of complex „potential theory" in C^n) 194–195
В. П. Захарюта, Решение проблемы Лейа о трансфинитном диаметре произвольного компакта в C^n (V. P. Zaharjuta, Solution of Leja's problem on transfinite diameter for any compact in C^n 195
J. Zając, On the problem of orthogonality for Teichmüller quasi-conformal mappings in doubly connected domains 195–196
J. Zderkiewicz, Sur la courbure des lignes de niveau dans les classes des fonctions convexes et Σ-convexes d'ordre α 196–197
Ю. Б. Зелинский, Об отображении областей комплексных многообразий (Ju. B. Zelinskiĭ, On mappings of domains in complex manifolds) . 197
E. J. Złotkiewicz, Generating functions for some classes of univalent functions 197–198
