## CONTENTS

R. THOM, Philosophie de la singularité . . . . .	7-14
C. BANICA, Structures doubles et triples sur un sous-espace complexe, applications . . . . .	15-30
K. BEHNKE, C. KAHN and O. RIEMENSCHNEIDER, Infinitesimal deformations of quotient surface singularities . . . . .	31-66
E. BIERSTONE and P. D. MILMAN, Local analytic invariants . . . . .	67-78
G. BOLONDI, Homologie des espaces complexes . . . . .	79-84
J. W. BRUCE and P. J. GIBLIN, Families of spheres (and circles) . . . . .	85-102
A. D. BRUNO, Local method of nonlinear analysis . . . . .	103-120
A. CAMPILLO, Arithmetical aspects of saturation of singularities . . . . .	121-137
J. CHADZYŃSKI and T. KRASIŃSKI, The Łojasiewicz exponent of an analytic mapping of two complex variables at an isolated zero . . . . .	139-146
J. CHADZYŃSKI and T. KRASIŃSKI, Exponent of growth of polynomial mappings of $C^2$ into $C^2$ . . . . .	147-160
J. DAMON, On the Pham example and the universal topological stratification of singularities . . . . .	161-168
K.-H. FIESELER and L. KAUP, Quasi-isomorphic perversities and obstruction theory for pseudomanifolds . . . . .	169-193
K.-H. FIESELER and L. KAUP, The vanishing invariants in intersection homology of complex spaces . . . . .	195-205
J.-P. FRANCOISE, Relative cohomology and volume forms . . . . .	207-222
H. A. HAMM, Morse theory on singular spaces and Lefschetz theorems . . . . .	223-237
T.-C. KUO, A natural equivalence relation on singularities . . . . .	239-243
R. LANGEVIN, G. LEVITT et H. ROSENBERG, Herissons et multiherissons (enveloppes paramétrées par leur application de Gauss) . . . . .	245-253
O. A. LAUDAL, B. MARTIN and G. PFISTER, Moduli of plane curve singularities with $C^*$ -action . . . . .	255-278
H. LEVINE, Stable mappings of 3-manifolds into the plane . . . . .	279-289
M. MANARESI, Permanence of local properties under hyperplane sections . . . . .	291-297
I. MIRANDA and T. RECIO, Thom's lemma in real geometry . . . . .	299-302
T. MOSTOWSKI, Tangent cones and Lipschitz stratifications . . . . .	303-322
A. PARUSIŃSKI, Lipschitz stratification of real analytic sets . . . . .	323-333
R. PIGNONI, Curves and surfaces in real projective spaces: an approach to generic projections . . . . .	335-351
A. PIOSKI, Multiplicity and the Łojasiewicz exponent . . . . .	353-364
C. PROCESI and G. SCHWARZ, Defining orbit spaces by inequalities . . . . .	365-372
G. RABY, Distance aux fibres d'un sous-analytique . . . . .	373-377
M. ROCZEN, The Picard group of the canonical resolution of a 3-dimensional simple singularity . . . . .	379-383
M. SHIOTA, Triangulation of subanalytic sets . . . . .	385-395

D. SIERSMA, Hypersurfaces with singular locus a plane curve and transversal type $A_1$ . . . . .	397-410
F. TAKENS, Measure and category . . . . .	411-418
L. V. THANH, Quelques remarques sur le spectre de singularité d'un germe de courbe plane . . . . .	419-427
T. URABE, Combinations of rational singularities on plane sextic curves with the sum of Milnor numbers less than sixteen . . . . .	429-456
C. T. C. WALL, Survey of recent results on singularities of equivariant maps . . . . .	457-474
G. WASSERMANN, Classification of singularities with compact abelian symmetry . . . . .	475-498
